Best of the Best

We currently have multiple subsystems that basically serve similar functions:

- Quality

- Health surveillance
- Preventive Care
- Immunization - Vaccine Management - [Task #118035: Vaccine contraindication and refusal harmonization and procedure harmonization too](#)
- Order Panels / picklists

Quality

- Enrollment: (provider / practice)
- Trigger: Encounter close

eCQMs stands for "Electronic Clinical Quality Measures". [eCQMs are digital representations of quality measures](#) that are used to assess the performance of healthcare providers and organizations in delivering high-quality patient care. eCQMs are calculated using clinical data that is extracted from electronic health record (EHR) systems, making it possible to automate the process of quality measurement and reporting.

eCQMs are defined using clinical quality measures (CQMs), which are evidence-based metrics that are used to assess the quality of healthcare services. CQMs are developed by various organizations, including the [National Quality Forum](#) (NQF), the Agency for Healthcare Research and Quality (AHRQ), and the Centers for Medicare and Medicaid Services (CMS).

Childhood Immunization Status

Measure Versions

EMEASURE CODE	MEASURE YEAR	FULL VERSION NUMBER	TITLE
CMS117v10	2022	10.0.000	Childhood Immunization Status
CMS117v9	2021	9.2.000	Childhood Immunization Status
CMS117v8	2020	8.3.000	Childhood Immunization Status
CMS117v7	2019	7.2.000	Childhood Immunization Status
CMS117v6	2018	6.2.000	Childhood Immunization Status
CMS117v5	2017	5.1.000	Childhood Immunization Status

Description

Percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV), one measles, mumps and rubella (MMR); three or four H influenza type B (Hib); three hepatitis B (Hep B); one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (Hep A); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday

Guidance

Numerator criteria includes evidence of receipt of the recommended vaccine or the following: -- DTaP: Adverse reaction to the DTaP or Td vaccine; or encephalopathy due to DTaP or Td vaccination -- Polio (IPV) vaccine: Adverse reaction to the IPV vaccine, streptomycin, polymyxin B, or neomycin -- MMR Vaccination: Immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; adverse reaction to neomycin; history of measles, mumps, or rubella; or a seropositive result for the antigens -- Hib: Adverse reaction to the Hib vaccine -- Hepatitis B: Seropositive result for the antigen, adverse reaction to the hepatitis B vaccine, adverse reaction to common baker's yeast, or a history of hepatitis B illness -- Chicken pox (varicella zoster): Seropositive result for the antigen; immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; adverse reaction to neomycin; or a history of varicella zoster -- Pneumococcal: Adverse reaction to the pneumococcal vaccine -- Hepatitis A: Seropositive result for the antigen, adverse reaction to the hepatitis A vaccine, or a history of hepatitis A illness -- Rotavirus: Adverse reaction to the rotavirus vaccine, severe combined immunodeficiency, or a history of intussusception -- Influenza: Adverse reaction to the influenza vaccine; immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; or adverse reaction to neomycin The measure allows a grace period by measuring compliance with these recommendations between birth and age two. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (<https://ecqi.healthit.gov/qdm>) for more information on the QDM.

CMS125v6	2018	6.2.000	Breast Cancer Screening
CMS125v5	2017	5.0.000	Breast Cancer Screening

Description

Percentage of women 50-74 years of age who had a mammogram to screen for breast cancer in the 27 months prior to the end of the Measurement Period

Guidance

Patient self-report for procedures as well as diagnostic studies should be recorded in 'Procedure, Performed' template or 'Diagnostic Study, Performed' template in QRDA-1. This measure evaluates primary screening. Do not count biopsies, breast ultrasounds, or MRIs because they are not appropriate methods for primary breast cancer screening. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (<https://ecqi.healthit.gov/qdm>) for more information on the QDM.

Patient Group Definitions

GROUP	DESCRIPTION	INSTRUCTIONS LINKS
Initial Population	Women 51-74 years of age with a visit during the measurement period	Webchart Instructions
Denominator	Equals Initial Population	Webchart Instructions
Denominator Exclusions	Women who had a bilateral mastectomy or who have a history of a bilateral mastectomy or for whom there is evidence of a right and a left unilateral mastectomy. Exclude patients who are in hospice care for any part of the measurement period. Exclude patients 66 and older who are living long term in an institution for more than 90 consecutive days during the measurement period. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior Exclude patients receiving palliative care during the measurement period. Complex Measures

Be aware some measure require multiple reports

Enrollment

The screenshot displays the Maui WebChart interface. The top navigation bar includes links for Appointments, Dictation/Transcription, Financials, Medications/Allergies/Scripts, Quality of Care, COVID Lab Results, and Accounting. The main content area is titled 'Legacy Quality Reports' and lists various reports under three categories: Legacy Quality Reports, MIPS Quality Reports, and Additional Quality Reports. The 'Enrollment' section is highlighted in the left sidebar, showing options to 'Enroll' and 'Check MIPS Participation Status'.

Drill down detail

Problems

- Quality measures are not automatically developed. Laborious process to define them. Dependent on value sets and they change from year to year.
- Value sets need to be explorable for Exclusions if patient is in the Denominator / Initial Patient Population
- System reports need to be cleaned up. Old reports need to be removed.
- Better visibility to providers in real time. Need to get feedback from providers if they think something is not calculated correctly.
- Providers must place orders manually. No automated process.
- New ideas just built for rolling up stats to practice (or system) level enrollments

Commercial Quality - Based on CPT2 Codes

See [Layout that does the calculation:ArchiveEncounterObsProcessing.html](https://pm.mieweb.com/issues/85752)
<https://pm.mieweb.com/issues/85752>

Ashley Will produce a list of commercial quality programs.

Health surveillance / Medical Surveillance

Defining Panels

The screenshot shows a web application interface for defining health surveillance panels. The browser address bar displays `masterdaily.dev.webchart.app/webchart.cgi?f=layout&...`. The user is logged in as "David, Dave - SuperUser". The application has a top navigation bar with tabs: Admin, My Settings, Access, Chart, System, Interface, Orders, Reference, Printing, Scheduling, HSP : Health Surveillance (selected), Version, and Employer Organization. The main content area is titled "Panel" and contains a table with the following structure:

Order	Criteria
☐	Exposure-Pertussis (5 groups, 5 rows)
☐	Exposure-TB Screening and Testing (4 groups, 4 rows)
☐	Exposure-Varicella (6 groups, 6 rows)
☐	Flu Program (3 groups, 4 rows)
☐	OSHA Bloodborne Pathogen (4 groups, 7 rows)
☐	OSHA Mini Respiratory Protection Program (1 group, 1 row)
☐	OSHA Noise (3 groups, 5 rows)
☐	OSHA Respiratory Protection Program (4 groups, 5 rows)
☐	Pre-placement (11 groups, 11 rows)
☐	Rabies Vaccination Program (6 groups, 7 rows)
☐	Respirator Fit Testing (2 groups, 3 rows)
☐	Respirator Medical Approval-Voluntary (6 groups, 9 rows)
☐	TB Sensitive (Annual Symptom Screening for HCP with untreated LTBI) (4 groups, 4 rows)
☐	TB Sensitive (Non-Human Primate Contact) (4 groups, 5 rows)
☐	TB Surveillance (10 groups, 14 rows)
☒	Wellness Program (5 groups, 5 rows)
☐	Glucose (1 row)
☐	Lipid Profile (1 row)
☐	Vitals (1 row)
☐	Wellness Program (1 row)
☐	Wellness Program Opt In Form (1 row)

Evaluating Panels

Nightly Job

<https://pm.mieweb.com/issues/117951> - Too many jobs - There is a ticket to redo this. I propose we make a new evaluator and leave the old one alone

Recommendations

Discuss RE..

Are there automatic RE?? There needs to be.

Panel Expiration

Reporting

Do we have any???? ;-)

Problems

- No way to know if a procedure is not performed easily
 - Not done vs Never ordered vs Late - Quality could help here... by month or quarter.
- Cron job heavy. Every chart has to be evaluated every night for many panels.
- If someone deletes an order, it's easy to be compliant but maybe not right? Maybe that is good tho
- Indication and Contraindications are ugly JS code and cannot be indexed.

Preventive Care

Legacy

The screenshot shows a web browser window with the URL `maui.webchartnow.com/webchart.cgi?f=chart&s=pat&pat_id=102&v=encounter&encopp=exam&enc_la...`. The page displays patient information for **TODDLER, TOMMY**, 4 y/o M, with 1 task, 40 encounters, 42 orders, and 8 requests. The user is **MIE-Homer, Doug R - SuperUser** at **US/Hawaii**. The patient's RAF is 2.709 (High) and MIE-10053.

The **Preventive care** tab is active, showing a list of procedures with input fields for the date and notes, and columns for the last reported date and last documented date in the patient record.

Procedure	Enter New Date	Notes	Last Reported Date	Last Documented in Patient Record
Cholesterol Screening: ⓘ				none
Colonoscopy: ⓘ				none
FIT DNA: ⓘ				none
FOBT: ⓘ				none
Colorectal Cancer Screening: ⓘ				none
Depression Screening: ⓘ				02-18-2020
Prostate Exam: ⓘ				none
Retinal Screening:			(03-23-2023)	none
Diabetic Foot Exam: ⓘ (includes Visual, Pulse and Sensory)				none

Standing Orders

<https://pm.mieweb.com/issues/92676>  Standing Orders Redesign

<https://pm.mieweb.com/issues/117951> - HS cleanup

Recurrence for requisition? Should we kill it and instead do Due List Recurrence (or just make it easier?) - Would like to talk to multiple people about the process of making the requisition and get Prior Authorization.

We cannot forget about standing orders and the crossover for HS. Duplicate orders will be bad. We need to make sure Standing Orders are done before HS fires off looking for other orders. Timing is going to be a problem if standing orders do not look for duplicate orders too.

Smart Plan

- Ordering Membership
- Seeing results

Best of the Best

- Membership is explicit (Denominator)
- Panel Expiration is explicit (fast calculation)
 - should have recalc on update (document) and forced vs floating
- Orders Automatically ordered
- Order due date missed vs Panel Expiration
 - No one wants to do HS RE if you don't need to.
- Measure Calc (auto-calc monthly or quarterly) - enrollments need work for HSP
 - Missing appointments or No appointments (what frequency)

Panel = Risk (Risk = Disease, Exposure Risk)

Membership = criteria to join a panel (IPP/Denominator)

Numerator (criteria for panel met within deadline)

SEG = Groups of Risks

TODO:

- Redefine Actions
- Redefine Action Evaluators to produce orders
- Develop Enrollment for providers
- Develop Measure for OSHA / ValueSets for Numerator and Denominator
